

MOCHI rzmong RZ-78 – mecha model-kit style decal sheet

case\_luar\_lcd\_23\_40mm\_smooth\_v3 · A4 · scale 1:1 · WHITE vinyl – print layer only (no cut lines)  
Original fan design inspired by generic mecha model-kit decals – no official logos or trademarks; all codes (RZ-78, R.Z.M.F.) are invented.  
**PRINT AT 100 % / "ACTUAL SIZE" (no "fit to page"). The bar must measure 50 mm.**

NOTES · Numbers = placement-guide keys (placement\_guide.png / STICKER\_GUIDE.md). L = LEFT (+X), R = RIGHT (-X) seen from behind; the screen side is the FRONT. "spare" = extra copy.  
Material: WHITE gloss printable vinyl (primary) + clear gloss laminate, or white waterslide decal paper + clear coat. Clear vinyl has NO white: white text/margins become see-through (white case only).  
Solid pieces (blue/red/yellow/black) print 0.5 mm bleed past the cut; floating decals (emblem, marking block, shield, extras) keep a 0.3 mm white margin. Labels and notes are printed, not cut.  
Curved areas: V-fin 15 sits on the gently curved visor top (pre-flattened); dome tri-stripe 16a-d is segmented – butt the segments on the centre line, or use the single ALT stripes 17B/17C. Warm vinyl on curves.

– area below is intentionally blank: trim it off and reuse the vinyl –
