NOTES · Numbers = placement-guide keys (placement_guide.png / STICKER_GUIDE.md). L = LEFT (+X), R = RIGHT (-X) seen from behind; the screen side is the FRONT. "spare" = extra copy.

Material: WHITE gloss printable vinyl(primary)+ clear gloss laminate, or white waterslide decal paper + clear coat. Clear vinyl has NO white: white text/blossoms/margins become see-through (white case only).

Solid pieces (panels, wing, skirts, strips, vent, splitter, ofuda) print 0.5 mm bleed past the cut; floating decals (emblem, shimenawa, petal trails, omamori, spray, foxes, petals) keep a 0.3 mm white margin.

Curved areas: sakura spray 15 sits on the gently curved visor top (pre-flattened); dome petal stripe 16a-d is segmented — butt the segments on the centre line, or use the single ALT stripes 17B/17C. Warm vinyl on curves.

— area below is intentionally blank: trim it off and reuse the vinyl —
