Material: WHITE gloss printable vinyl (primary) + clear gloss laminate; or white waterslide decal paper + clear coat. Clear vinyl prints NO white: white parts become see-through (OK only on a white case).
Black parts have 0.5 mm bleed past the cut line; floating decals have a 0.3 mm white vinyl margin (invisible on a white case). Labels and this text are printed but not cut.
Curved areas: dome stripes 14/15 are segmented – lay segments end-to-end along the centre line; or use the 2 mm ALT stripes 16. Warm vinyl with a hair-dryer on curves. All other pieces sit on flat faces.
